Screen Before the New Year!

Available at no cost to you

Skin cancer can hide in plain sight. Don't let the year end without taking a proactive step toward your skin health. Here's how it works:

How SkinIO Works

Check-in and prep:

- Check in at the desk.
- Share a brief medical history with your Certified Skinographer.

Full-skin imaging:

- Disrobe to your comfort level; more visible skin means a more complete evaluation.
- Your Skinographer captures regional photos and close-ups of any spots you're worried about.

Dermatologist review and follow-up:

- A panel of dermatologists reviews your images and emails results in 2–3 days.
- If needed, our team arranges an in-person visit with a local, in-network dermatologist in 2–3 weeks.
